Electronic design automation (EDA), also referred to as electronic computer-aided design (ECAD), is a category of software tools for designing electronic systems such as integrated circuits and printed circuit boards. The tools work together in a design flow that chip designers use to design and analyze entire semiconductor chips. Since a modern semiconductor chip can have billions of ...

Electrical engineers design, develop, test, and supervise the manufacturing of electrical equipment, such as electric motors, radar and navigation systems, communications systems, and power generation equipment. Electronics engineers design and develop electronic equipment, including broadcast and communications systems, such as portable music players and Global Positioning System (GPS) devices.

9.SHOP PRACTICES. Knowing about good electronic shop practices begins with introduction to the basic tools and test instruments used in electronic repair, production and troubleshooting. It continues with "hands-on" activity directed towards learning practical skills such as soldering and de-soldering and making connecting leads and cables.
