A study by the Association for Packaging and Processing Technologies (PMMI) found that robots are expected to handle 34% of primary pharmaceutical packaging operations in North America by 2018, compared with 21% in 2013 (2).

Using Robotics In Pharmaceutical Manufacturing

An industrial robot is a robot system used for manufacturing. Industrial robots are automated, programmable and capable of movement on three or more axes. Typical applications of robots include welding, painting, assembly, pick and place for printed circuit boards, packaging and labeling, palletizing, product inspection, and testing; all accomplished with high endurance, speed, and precision.
