The theory of value, not surprisingly, concerns the determinants of the "value" of a commodity. The study of this subject is at the center of modern microeconomic theory and is closely intertwined with the subject of the allocation of scarce resources for alternative ends. The logical place to start is with a definition of the word value.

Academic honesty is fundamental to the activities and principles of a university. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed, and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful.
