

### **microorganisms and biotechnology pdf**

A microorganism, or microbe, is a microscopic organism, which may exist in its single-celled form or in a colony of cells.. The possible existence of unseen microbial life was suspected from ancient times, such as in Jain scriptures from 6th century BC India and the 1st century BC book On Agriculture by Marcus Terentius Varro. Microbiology, the scientific study of microorganisms, began with ...

Nanotechnology has become one of the most promising technologies applied in all areas of science. Metal nanoparticles produced by nanotechnology have received global attention due to their extensive applications in the biomedical and physiochemical fields. Recently, synthesizing metal nanoparticles using microorganisms and plants has been extensively studied and has been recognized as a green ...

The Journal of â€œFood Biotechnology Researchâ€• is an international, peer-reviewed open accesses journal dedicated to discuss the current developments and applications of modern genetics, enzymatic, metabolic and systems-based biochemical processes in food and food-related biological systems.

### **Journal of Food Biotechnology Research - iMedPub**

The toxic hydrogen sulfide is a waste product of sulfate-reducing microorganisms; its rotten egg odor is often a marker for the presence of sulfate-reducing microorganisms in nature. Sulfate-reducing microorganisms are responsible for the sulfurous odors of salt marshes and mud flats. Much of the hydrogen sulfide will react with metal ions in the water to produce metal sulfides.

### **Sulfate-reducing microorganisms - Wikipedia**

enhance the generation of electricity many folds. Except anodophiles, the microbes are incapable of transferring electrons directly to the anode.

1.. IntroductionPlastics are man made long chain polymeric molecules (Scott, 1999).More than half a century ago synthetic polymers started to substitute natural materials in almost every area and nowadays plastics have become an indispensable part of our life.

### **Biological degradation of plastics: A comprehensive review**

Biotechnology Letters is the world's leading rapid-publication primary journal dedicated to biotechnology as a whole " that is to topics relating to actual or potential applications of biological reactions affected by microbial, plant or animal cells and biocatalysts derived from them.. All relevant aspects of molecular biology, genetics and cell biochemistry, of process and reactor design ...

### **Biotechnology Letters - incl. option to publish open access**

The development of eco-friendly technologies in material synthesis is of considerable importance to expand their biological applications. Nowadays, a variety of inorganic nanoparticles with well-defined chemical composition, size, and morphology have been synthesized by using different microorganisms, and their applications in many cutting-edge technological areas have been explored.
