Microscopy is the technical field of using microscopes to view objects and areas of objects that cannot be seen with the naked eye (objects that are not within the resolution range of the normal eye). There are three well-known branches of microscopy: optical, electron, and scanning probe microscopy, along with the emerging field of X-ray microscopy. ...

Atomic force microscopy (AFM) or scanning force microscopy (SFM) is a very-high-resolution type of scanning probe microscopy (SPM), with demonstrated resolution on the order of fractions of a nanometer, more than 1000 times better than the optical diffraction limit

Introduction to Optical Microscopy provides a rigorous and comprehensive overview of the fundamentals of optical microscopy. Starting from basic principles in Fourier optics, partial coherence, 3D imaging theory, and the physics of scattering and fluorescence, Introduction to Optical Microscopy explores a broad range of microscopy techniques.

JB-4 Â® Plus Embedding Kit JB-4 Â® Plus Embedding Kit for light microscopy is a water soluble, GMA based, plastic resin kit intended for use in the preparation of embedded samples for high resolution light microscopy. Its cooler acting accelerator system offers greater heat protection of tissue components. It yields semi-thin sections (0.5 - 2Âµm) with excellent morphological preservation.

Microscopy, which has served as a fundamental scientific technique for centuries, remains an invaluable tool in chemistry, biology, healthcare, and forensics.

Welcome to the third edition of the Handbook of Biological Statistics! This online textbook evolved from a set of notes for my Biological Data Analysis class at the University of Delaware. My main goal in that class is to teach biology students how to choose the appropriate statistical test for a particular experiment, then apply that test and interpret the results.

Images in fluorescence microscopy are inherently blurred due to the limit of diffraction of light. The purpose of deconvolution microscopy is to compensate numerically for this degradation.

Department of Biology. Biology today is the study of all living organisms and their relationships and interactions with other living organisms. Different biologists study different elements of Biology: genetics, cell biology, physiology, ecology, population biology, limnology, toxicology, conservation, behaviour, parasitology, development, etc.

A Passion For Radio.. Part II. Vintage Radios. Notes on buying and refurbishing. By Ian Walker. U.K. Introduction. My previous article [Part I] discussed some of my adventures while in the BBC, this time around I will write a few lines on old radios. To me most modern portable radios lack charm and if you look inside there might be a few integrated circuits and a smattering of discreet ...

Cause: The origin of parvovirus in dogs is not known, but the causative virus is a very resistant one. It can tolerate environmental stress, such as temperature, common disinfectants and can exist for months in contaminated compounds.
