Migration and Globalization

a policy issue, migration is seen as significant in the context of an ageing population, future labour supply and the prospects for economic growth as well as for its social and environmental impacts. In this study, the Commission has been asked by the Australian Government to focus specifically on the economic impacts of migration.

Economic Impacts of Migration and Productivity Commission

Migration is a global phenomenon caused not only by economic factors, but also by social, political, cultural, environmental, health, education and transportation factors. It commonly takes place because of the push factor of less opportunities in the socio-economic situation and also because of pull factors that exist in more developed areas.

Pull and Push Factors of Migration: A Case Study in the

The Great Black Migration: Opportunity and competition in northern labor markets South. The migration that occurred during and after World War I has received the most attention historically, but the period of migration from 1940 through 1970 was larger and thus had potentially greater labor market effects. I focus on this later migration here.

The Great Black Migration: Opportunity and competition in

Migration is a key feature of our increasingly interconnected world. It has also become a flashpoint for debate

in many countries, which underscores the importance of understanding the patterns of global migration and the economic impact that is created when people move across the world's borders.

Global migration's impact and opportunity | McKinsey

Intervening Opportunity Model – Migrants are open to possible opportunities that may lie between origin and destination – Example of "step" migration rural → urban (goal is job/city life) – migrant might stop in local town instead of going all the way to major city if he/she gets a job!
