Molecular biology / m ɔːlɪkjʊləˈbɪɒlədʒi / is a branch of biology that concerns the molecular basis of biological activity between biomolecules in the various systems of a cell, including the interactions between DNA, RNA, proteins and their biosynthesis, as well as the regulation of these interactions. Writing in Nature in 1961, William Astbury described molecular biology as:

### **Molecular biology - Wikipedia**

Molecular biology is the study of biology at a molecular level. The field overlaps with other areas of biology, particularly genetics and biochemistry. Molecular biology chiefly concerns itself with understanding the interactions between the various systems of a cell, including the interrelationship of DNA, RNA and protein synthesis and learning how these interactions are regulated.

The Centre for Cellular & Molecular Biology (CCMB) is a premier research organization in frontier areas of modern biology. The objectives of the Centre are to conduct high quality basic research and training in frontier areas of modern biology, and promote centralized national facilities for new and modern techniques in the inter-disciplinary areas of biology.

Journal of Molecular Biology Research (JMBR) is an international, double-blind peer-reviewed, open-access journal, published by the Canadian Center of Science and Education. It publishes original research, applied, and educational articles in all areas of molecular biology. The journal is published in both print and online versions.

### **Molecular & Cell Biology - nyu.edu**

Biochemistry is the study of chemical processes within and relating to living organisms. By controlling information flow through biochemical signaling and the flow of chemical energy through metabolism, biochemical processes give rise to the complexity of life.

Department of Biology. Biology today is the study of all living organisms and their relationships and interactions with other living organisms. Different biologists study different elements of Biology: genetics, cell biology, physiology, ecology, population biology, limnology, toxicology, conservation, behaviour, parasitology, development, etc.
