Improving neural networks by preventing co-adaptation of

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.

Implementation and SNIPE: While I was editing the manuscript, I was also implementing SNIPE a high performance framework for using neural networks with JAVA. This has to be brought in-line with the manuscript: I'd like to place remarks (e.g. "This feature is implemented in method XXX in SNIPE") all over the manuscript.

A Brief Introduction to Neural Networks [D. Kriesel]

IEEE Transactions on Neural Networks is devoted to the science and technology of neural networks, which disclose significant technical knowledge, exploratory developments, and applications of neural networks from biology to software to hardware.. This Transactions ceased production in 2011. The current retitled publication is IEEE Transactions on Neural Networks and Learning Systems.

A probabilistic neural network (PNN) is a four-layer feedforward neural network. The layers are Input, hidden, pattern/summation and output. In the PNN algorithm, the parent probability distribution function (PDF) of each class is approximated by a Parzen window and a non-parametric function. Then, using PDF of each class, the class probability of a new input is estimated and Bayes' rule is ...
