

remote sensing in geoscience pdf

Welcome. On behalf of the IEEE Geoscience and Remote Sensing Society and the Organizing Committee we cordially invite you to participate, next July 2018 in Valencia, Spain, to the International Geoscience and Remote Sensing Symposium, IGARSS 2018, the 38th annual symposium of the IEEE Geoscience and Remote Sensing Society (GRSS).

2018 IEEE International Geoscience and Remote Sensing

Remote sensing is the acquisition of information about an object or phenomenon without making physical contact with the object and thus in contrast to on-site observation, especially the Earth. Remote sensing is used in numerous fields, including geography, land surveying and most Earth Science disciplines (for example, hydrology, ecology, meteorology, oceanography, glaciology, geology); it ...

Remote Sensing of Environment - An Interdisciplinary Journal. Remote Sensing of Environment serves the Earth observation community with the publication of results on the theory, science, applications, and technology of remote sensing studies. Thoroughly interdisciplinary, RSE publishes on terrestrial, oceanic and atmospheric sensing.

To secure uninterrupted distribution of electricity, effective monitoring and maintenance of power lines are needed. This literature review article aims to give a wide overview of the possibilities provided by modern remote sensing sensors in power line corridor surveys and to discuss the potential and limitations of different approaches.

Remote sensing methods for power line corridor surveys

Vegetation Indices (VIs) obtained from remote sensing based canopies are quite simple and effective algorithms for quantitative and qualitative evaluations of vegetation cover, vigor, and growth dynamics, among other applications. These indices have been widely implemented within RS applications using different airborne and satellite platforms with recent advances using Unmanned Aerial ...

Data-cubes can be used to analyse continental time-series of remote sensing data. Geometric and spectral corrections are essential for comparability of measurements.

The Australian Geoscience Data Cube – Foundations and

Drones are now being used with laser scanners, as well as other remote sensors, as a more economical method to scan smaller areas. The possibility of drone remote sensing also eliminates any danger that crews of a manned aircraft may be subjected to in difficult terrain or remote areas.
