VERIFICATION vs VALIDATION are hugely confused and debated terms in the software testing world. You will encounter (or have encountered) all kinds of usage and interpretations of these terms, and it is our humble attempt here to distinguish between them as clearly as possible.

Verification vs Validation - Software Testing Fundamentals

Verification and validation are independent procedures that are used together for checking that a product, service, or system meets requirements and specifications and that it fulfills its intended purpose. These are critical components of a quality management system such as ISO 9000. The words "verification" and "validation" are sometimes preceded with "independent", indicating that the ...
